

Doctors and Pharmacies

Every XUSOM student reaches Aruba with the travel insurance and after he/she receives the student's residency permit, gets an AZV health insurance card. This card allows students with access to family physician, Dentist, ER and other medical services. In addition, Dr. J. Croes MD and Dr. Mrs. Alvarez MD are part time faculty who run family clinics within 5-10 minutes from the campus and have facilities for consultation and psychotherapy. The Family physicians also provide referral services for specialty care. Most of the prescription drugs and consultation is provided at no additional cost to the students who have AZV cards. The IMG Insurance of the students provides facilities for reimbursement.
